

# ONE SOLUTION FOR COMPREHENSIVE RAIL EFFICIENCY

MANAGEMENT AND MAINTENANCE FROM  
THE EXPERTS IN RAIL LOGISTICS

## CIG LOGISTICS

Safety • Integrity • Technology

CIG Logistics has created a name in the oil and gas industry for superior, tech-driven transloading and inventory management solutions. Yet our approach to creating a frictionless supply chain is not bound by one industry or commodity. If you have extensive rail operations, we can help.

---

You may currently work with multiple rail maintenance and transportation management partners, but siloed services can slow processes and create gaps in support and communication.

The advantages of consolidating services in a strategic partnership with CIG allows for:

- Standardized safety policies across all service areas for safer, more consistent service
- Access to scalable, fit-for-purpose terminals in key locations
- Real-time reporting and inventory management through cloud based connectivity
- Strategic planning and optimization of your supply chain
- Accountability between trades

## MANAGEMENT AND MAINTENANCE FOR EVERY MOVING PART

Our experience in rail logistics means we understand each component is vital to successful transportation and transloading.

Our services include:

### » Rail Switching

Engineers, Conductors, and Switchmen  
LULA Qualifications  
Shuttle Wagon Operators  
Remote Control Operators

### » Rail Safety Training

CIG policies resemble Class One GCOR  
Airbrake & Train Handling

### » Track

Track Inspections  
Switch Maintenance/Track Repair  
Inspection Training

### » Radio Communications

Communications Assessment  
FCC Compliant Radio Programming  
Communication Set Up  
Radio Maintenance

### » Railcar Management Solutions/ Inventory Management Solutions
